

PERSONNEL TIME AND ATTENDANCE

...the end-to-end solution for small and medium-sized businesses

Are you looking for personnel time & attendance software that is

- Compact, economical, and efficient
- Easy to use
- Flexible
- And that offers the traditional multi-terminal solution with an integrated web desktop?

In only a few days the complete end-to-end solution can be up and ready in your company, from the business process of capturing personnel attendance times at the terminal to the preparation of wage data. Should your business processes require it, the personnel attendance times can also include references to projects and orders.

Adicom® software components support service and manufacturing companies in preparing wage data and project, or order-based, accounting.

Adicom® offers a professional and powerful end-to-end solution with the tailor-made components of the Adicom® Software Suite.

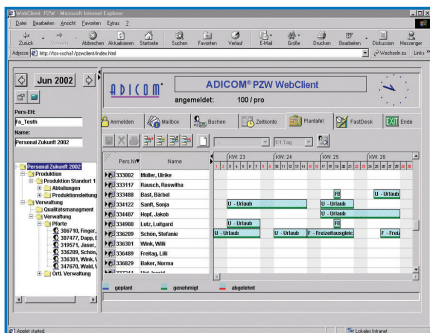

Functions at a glance:

- Virtual employee time-keeping terminal for time and cost center postings
- Graphic planning board for absentee planning and vacation approval
- Time sheets, monthly view for posting adjustments and display of calculated results
- Workflow-oriented notification and approval concept for vacation planning and posting adjustments
- Display of time accounts and vacation budgets
- Event-driven quick processing dialog for time corrections and project time recording
- Annual absenteeism matrix

The starter package includes:

- Licenses for Personnel Time & Attendance and project time recording
- Licenses for two time managers
- Time recording terminals with RJ 45 network connections
- IDs/key fobs (non-contact)
- Installation and instructions
